

Kijlstra Precast Environmental Policy

As a leading European manufacturer of precast products, Kijlstra Precast recognise that our activities inevitably impact on the environment. Our aim is to minimise any adverse effects as a result of our manufacturing.

In producing this policy, Kijlstra Precast wishes to demonstrate its commitment towards safeguarding the environment.

To comply with all existing environmental legislation as a minimum level of performance.

To develop and maintain an effective environmental management system.

To continually strive to improve the environmental impact of the company's activities and prevent pollution.

To use the most environmentally sound materials.

To develop products to improve the environment.

To educate and train employees in environmental issues and the environmental effects of their activities.

To encourage recycling wherever practical.

To make waste reduction part of the management process.

To regularly review the overall environmental performance of the company.
